

CHART Design

30 August - 1 September 2019

Den Frie Centre of Contemporary Art, Copenhagen

CHART Design:

Etage Projects is returning to Den Frie Centre of Contemporary Art to take part in the 2019 edition of collectible design fair CHART Design. The presentation will include new works by Danish artist FOS; among others a bronze, brass and glass sofa table and a new version of the *Swivel Table* in Oregon pine, along with contemporary classics such as the brass and glass piece *Glass, Pitcher, Tray*. The gallery will also show works from Dutch/New Zealand designer Sabine Marcelis' alluring new collection of ombre double-casted cubes, statement pieces from London-based design studio Soft Baroque and exclusive one-of-a-kind jewellery by Danish contemporary jewellery designer Jo Riis Hansen.

About Etage Projects:

Etage Projects is a Copenhagen-based art and design gallery specialising in a cross-aesthetic method. Actively questioning and pushing the lines between art and design, abstraction and function, Etage Projects works with creatives who form their praxis in-between established notions of contemporary art and design, thereby seeking to extend and to enrich the field of collective and interdisciplinary culture. The gallery was founded in 2013 and has grown to become an influential, ambitious platform, customary to leading international fairs, exhibition venues, magazines and publications. Etage Projects has among others exhibited at Design Miami, Design Miami/Basel, Chart Art Fair, NOMAD Monaco, NOMAD St. Moritz and Salon Art + Design, New York. Furthermore, gallery owner Maria Foerlev is a prominent figure in the European art-meets-design sphere, engaged in a number of communicative activities, among others as jury member of the Biennial of Crafts and Design. Working with a selection of spearheading artists such as FOS, Sabine Marcelis and Guillermo Santomà, Etage Projects is curating and advising on a wide range of large-scale public and private projects - among others FOS's complete decoration of the official residence of Denmark's prime minister and Guillermo Santomà's intervention at Museo Cerralbo in Madrid.
